EDUCATION

VNR Vignana Jyothi Institute of Engineering and Technology	2022 - 2026
B.Tech in Computer Science Engineering (AIML)	CGPA: 8.60
CCBP 4.0 BY NxT Wave	2022 - 2026

PROJECTS

Real-time Monitoring of CCTV for Threat Detection — Ultralytics, OpenCV, Jetson Orin NX, Flask

- Developed an intelligent CCTV surveillance system with a web dashboard for real-time fight and weapon detection, triggering immediate SMS and voice alerts for rapid incident response.
- Integrated YOLOv11 for weapon detection and a 3D CNN with sliding-window spatio-temporal analysis, deploying on Jetson Orin NX for efficient edge AI inference.
- Published a **Patent** and research paper (AI on the Edge: A Survey of Threat Detection Systems for Smart CCTV Cameras) accepted at ICACECS 2026 (Scopus Indexed Springer Series).

Optideliver – AI-Delivery Optimization System — Scikit-learn, Twilio, Flask, MongoDB, Next.js

- Built a delivery scheduling engine that predicts suitable time slots for customers using historical delivery patterns and user profiles. Implemented route optimization and clustering to reduce travel distance and resource wastage.
- Designed modular Python backend services for slot prediction, route planning, and notifications, enabling easy scaling and integration with postal workflows.
- **Research Paper:** OptiDeliver: An AI-driven System to Modernise Last-Mile Delivery Systems - Presented at IGNITE-2026 (IEEE Conference), KJ College of Engineering.

SportAI – AI-Athlete Management Platform — Flutter, OpenCV, RAG, LangChain, SQL

- Built a live exercise monitoring system that tracks athlete posture in real time, counts exercise sets, and stores workout activity for performance analysis.
- Implemented a RAG-based coach assistant that provides personalized guidance using athlete health data and training history.
- Developed a risk score prediction model using Random Forest on athlete vitals data and automated daily suggestion emails through Gmail.

DigiPraman — Loan Verification& Fraud Detection Platform — Flutter, YOLOv8, XGBoost, FastAPI

- Built a multi-layer fraud detection service (VIDYA AI) using YOLOv8, Google Cloud Vision OCR, perceptual hashing, and an XGBoost risk model to auto-triage loan evidence into approve, review, or video-verify tiers.
- Developed a full-stack loan management system with FastAPI/PostgreSQL, a React risk dashboard, and a Flutter app with geolocation, 2FA, and speech-to-text for field officers.

TECHNICAL SKILLS

Programming Languages	C, C++, R, Python, SQL
Frameworks/Libraries	Flask, MERN, Flutter, Streamlit
AI/ML Technologies	OpenCV, Gen AI, RAG, YOLO, NLP, PyTorch
Data Visualization	Power BI, Tableau, R Studio
Databases	MySQL, MongoDB, SQLite
Platforms	GitHub, Docker, Windows, Linux

CERTIFICATIONS

- | | |
|--|--|
| • Introduction to IoT Certification by NPTEL | • Amazon ML Summer School 2025 |
| • Coder - Smart Interviews: Global Rank | • Intro to Databases Certification(CCBP 4.0) |
| • OCI 2025 Certified AI Foundations Associate | • Developer Foundations Certification(CCBP 4.0) |

ROLES & RESPONSIBILITIES

Computer Society of India - Superior Non-Technical Head	Jun 2024 – Present
Krithomedh, AIML Club - Superior Design Head	Aug 2024 – Present

ACHIEVEMENTS

- Winner of GDGC Solution Challenge 2025 – Developed SportAI (RAG, ML, OpenCV, Flutter)
- Selected for Amazon ML Summer School 2024 & 2025 (advanced machine learning)
- **Smart India Hackathon 2024** finalist - Top 5 teams of 13,000+ nationwide, for developing Optideliver
- **2nd Prize** in Project Contest & **Consolation Prize** in Paper Presentation at Convergence 2025
- **Stood 3rd** in Project Expo among 100+ teams, Dept. of CSE-AIML & IoT, VNRVJIET
